

## Magnetic Vehicle Sign Tips

Follow these tips for the use and care of your magnetic vehicle signs and you'll get years of use from the signs without damaging your vehicle.

- Wait at least 90 days to use a magnetic sign on newly painted vehicles — 60 days for clearcoat, 2 days for newly waxed surfaces.
- Remove your magnetic signs before running your car through an automatic car wash or a hand operated power wash. Hand wash the signs for longest life.
- Always apply clean, dry magnetic to a clean, dry vehicle. To guard against moisture and dirt buildup between the magnet and the metal surface, remove the magnet at regular intervals. Clean both the magnet and metal surface with mild detergent; wipe with a soft cloth or allow to air-dry.
- After waxing and polishing a vehicle, allow two days for wax to cure before re-applying magnets.
- Never place a magnetic sign on the ground with the magnet-side down. Tiny bits of iron debris can become attached that are hard to remove and can damage a vehicle's finish.
